

DOMESTIC VIOLENCE INTERVENTION SERVICES COUNSELING & CORPORATE OFFICE BUILDING

Domestic Violence Intervention Services (DVIS) is a non-profit organization dedicated to the eradication of domestic violence. Through the design of their new counseling and office, our team worked closely with the executive director to develop a plan which provided several distinct areas of separation. The interior spaces are meant for reconciliation, healing, understanding and growth within an open and inviting atmosphere. The spatial design and materials for the organization are to invoke a calm, welcoming, and safe environment for those needing services and treatment.

Our project team was tasked with providing frequent updates to DVIS's active board and donor groups, while maintaining a clear path of direction. During fundraising and design, the project was refined and spaces were modified to accommodate future needs. Since opening, DVIS has been able to provide services that were never before possible due to the size, orientation and flow of the building. The project has been a huge success for the community.
