

"THE CROSSING" BRIDGE AT GATHERING PLACE

Tulsa's continued investments in the river include a pedestrian bridge replacing the iconic but structurally deficient landmark. As part of a design competition, KKT designed an undulating bridge to echo the importance of the aquatic feature it spans. It was recognized as The People's Choice award winner. The concept featured an amphitheater and directed-view spots to highlight Turkey Mountain, the Gathering Place and downtown from various positions on the bridge. The bridge also cast shadows unique to each season and time of day, creating dynamic perspectives on our dynamic city.
