

TULSA OPERA BADEN HALL EXPANSION

KKT is assisting the Tulsa Opera with design concepts as part of their fundraising campaign for an addition and complete remodel of Baden Hall. The transformation includes a new 200-seat performance theater, a reworked stage, stadium seating, a new orchestra pit, renovated rehearsal areas, and adjustments to the service and loading dock entries. The re-imagined entry and lobby provide a more formal and engaging public entrance into Baden Performance Hall. Additionally, a full interiors renovation of the administration areas, corridors, restrooms and other public spaces has already been completed.
