

UNIT CORPORATION HEADQUARTERS

KKT designed new corporate headquarters for long-time client Unit Corporation. The new 196,000 SF six-story building includes a conference center with clerestory windows, offices for more than 500 employees, a safe-room, and a four-story parking garage linked to the building by an enclosed walkway. Sleek, modern elements and materials are designed to convey strength, stability, and timelessness. The fully master planned and landscaped 30-acre site occupies prime real-estate and was sited for a future office park expansion and potential retail center in outlying areas of the property.
