

EDUCARE I, II, III

KKT's expertise in educational design is reflected in our enduring Educare collaboration with the George Kaiser Family Foundation, Tulsa Public Schools, and various State and Federal partners. Each facility was designed to draw attention to the important work taking place within its walls. Each one provides a range of educational, medical, and social services for the entire family. Building materials and spaces engage children in their environments, and the design for each classroom distinctly addresses the social, emotional, and intellectual needs of the age group it serves. Natural light-filled classrooms open to outdoor learning areas and fun, interactive playgrounds. Facilities also house training rooms, full kitchens, family support rooms, and office spaces.

Each facility was built on the latest research and insights from the prior project(s). Having received national attention as an exceptional model for early childhood development services, Educare III is a highly-touted early childhood site and a favorite among all the Educare facilities in the nation. KKT is proud to have contributed to the design of Oklahoma's highly-acclaimed Educare facilities.
