

TRI COUNTY TECH COSMETOLOGY

With a fresh remodel and over 7,000 square feet, Tri County Tech's updated cosmetology salon is able to deliver top notch beauty services to the community. KKT facilitated the project through all aspects of design including Structural Engineering, Interior Design and Architecture. The renovation involved demolition to complete a new entry vestibule, the addition of multiple salon, manicure, pedicure, facial, waxing and shampoo bowl stations. Additionally, this fresh new look for the salon also came with updated, state-of-the-art equipment for these stations. Tri County Tech's expansion also includes additional classrooms, offices, storage spaces and a new laundry room. The brand new finishes throughout the studio bring a high-end feel to students, staff and clients.
